About Us

Welcome to Tecnol, an Angolan company of solutions in information technologies. We advise and support our customers in driving operational effectiveness and reaching their corporate business objectives through innovative, reliable and valuable results.

Tecnol maximizes the plus point of individual systems, enabling our customers to obtain the benefits of a fully integrated, functional and collaborative environment.

Mission Statement

Provide solutions to ensure a reliable, sustainable and best-fit IT environment to our clients.

Values

Our corporate strategy is to adhere to the best international business practices, customized to fit our clients' needs.

Our goal is to obtain excellence, innovation and results in everything we do through humbleness, respect, loyalty, accountability and technical excellence.

Principles/Philosophies

Our Corporate Philosophy is without integration, enterprise computing often takes the form of islands of automation, where the value of individual systems is not maximized because they are working on partial or full isolation. We can integrate all of your corporate enterprise computing needs.

Customers

Our customers are multinational companies and government organizations. We have a high volume of customers in the segment of oil & gas.

We support our clients in the development, implementation and integration of technological solutions to support the decision and performance improvement at the strategic, tactical and operational level.

Certifications/Partnerships

- Microsoft Gold Certified Partner
- Cisco Premier Certified Partner
- BMC Software Solution Partner
- Lenel Partner

Business Solution Management

 Are you really competitive, or *just competing*?

What it does:

On-premise business applications and enterprise resource planning. Software as a Service (SaaS) implementation, outsourced project management.

What it does for you:

Build profitability by improving business proficiencies and increase your performance with our recommendations on "best fit" solutions. BSU speeds your time to market with expert business solution design and implementations.

Let us show you how to become a Best-in-Class organization by speeding time to market with our Best-Fit customized solutions...

Communication and Information Technology

Can you *grasp* the power of IT?

What it does:

Experienced engineering/design services that create scalable and reliable core IT environments that complement your capabilities. Strategies to maintain continuous operations and communication solutions across a distributed enterprise. Managed service and data storage solutions and enterprise data center optimization.

What it does for you:

Reduce your total cost of ownership and help gain a competitive edge by improving your overall business performance. CIT's enhanced communication solutions ensure seamless, risk-free modernization of critical infrastructure and applications.

Let us show you how to gain a competitive edge through Best in Class solutions that help you compete...

Enterprise Security and Convergence

 Is your business *really* safe and secure?

What it does:

Protect your business from unauthorized access and optimize security operations. Raise issues of safety awareness to help support business continuity. Converge technology, people and processes as well as implement key policies, rules and controls.

What it does for you:

Enjoy greater peace of mind with more secure business interactions that protect your business investments. ESC ensures business continuation and helps you anticipate unforeseen problems and mitigate risk.

Let us show you how to secure business transactions and ensure business continuity...

IT Service Management

 Are you controlling IT...or is IT controlling you?

What it does:

Best practices consultation and expert implementations ensure IT compliance and streamline your people, processes and technologies. Programs to improve and ensure IT quality and availability across your business.

What it does for you:

Become more efficient and gain greater control of your IT environment through standardization. Improve your business productivity through better service delivery. ITSM builds customer satisfaction and reduce risks by enabling you to become 100% compliant.

Improve your efficiency and customer satisfaction through compliant solutions and best practices to reduce risk, streamline personnel, processes and technologies...

Service and Support Management

➤ Is your mission critical operation in *critical* condition?

What it does:

Structured, professional multi-level support and 24x7 customer service center installations driven by best-of-breed support solutions. Comprehensive maintenance agreements and programs to audit people, processes and tools. Optimization, management resources and productivity solutions.

What it does for you:

Ensure uninterrupted services that compliment your capabilities for greater customer satisfaction. SSM enables you to build your business faster by enabling you to focus on *core* business activities more.

Let us help you fix it so you can focus on your core business.
Why only provide a solution, when you can provide your customer an experience...
