About Us

Welcome to Tecno!, an Angolan company of solutions in information technologies. We advise and support our customers in driving operational effectiveness and reaching their corporate business objectives through innovative, reliable and valuable results.

Tecno! maximizes the plus point of individual systems, enabling our customers to obtain the benefits of a fully integrated, functional and collaborative environment.

Mission Statement

Provide solutions to ensure a reliable, sustainable and best-fit IT environment to our clients.

Values

Our corporate strategy is to adhere to the best international business practices, customized to fit our clients' needs.

Our goal is to obtain excellence, innovation and results in everything we do through humbleness, respect, loyalty, accountability and technical excellence.

Principles/Philosophies

Our Corporate Philosophy is without integration, enterprise computing often takes the form of islands of automation, where the value of individual systems is not maximized because they are working on partial or full isolation. We can integrate all of your corporate enterprise computing needs.

Customers

Our customers are multinational companies and government organizations. We have a high volume of customers in the segment of oil & gas.

We support our clients in the development, implementation and integration of technological solutions to support the decision and performance improvement at the strategic, tactical and operational level.

Certifications/Partnerships

- Microsoft Gold Certified Partner
- Cisco Premier Certified Partner
- BMC Software Solution Partner
- Lenel Partner
